SKILLS

Frontend: HTML5, CSS3, Tailwind CSS, DaisyUI, Shadcn/UI, React.js, React Router

Backend & Database: Node.js, Express.js, MongoDB, Firebase

Tools & Libraries: Axios, TanStack Query, JWT, Stripe, Git, GitHub, Postman

Deployment: Vercel, Netlify, Firebase

Soft Skills: Teamwork, Problem-solving, Time management, Adaptability

PROJECTS

Green Link – Plant Care & Management Platform

Built a responsive plant exploration web app using **Firebase Authentication, Firestore, and React**. Implemented secure user login, dynamic plant/tip listing, category-based filtering, and real-time updates. Optimized database structure and UI for performance and user experience across devices.

SnapFix – Service Sharing Platform

Developed a full-stack service marketplace where users can book, manage, and offer services. Integrated **Firebase Authentication, role-based dashboards, service CRUD operations**, and a real-time **booking system**. Enabled search/filter functionality and responsive UI for seamless user experience.
