Career Objective

As a passionate Full Stack Developer, I bring strong enthusiasm for building impactful web applications and continuous learning in a fast-paced environment. I have a solid foundation in JavaScript, React.Js, Next.Js, Node.Js, Express, and MongoDB, with hands-on experience through academic and personal projects. My goal is to contribute my technical skills, adaptability, and dedication to support innovative teams and drive meaningful business growth.

Technical & Soft Skills

Expertise: JavaScript (ES6+), React.js, React Router, Firebase, Tailwind CSS, HTML5, CSS3
Comfortable: Rest API, Chrome Dev Tool, Node.js, Express.js, MongoDB, JWT, Axios
Familiar: Next.js, Prisma, Figma, XD
Tools: Git & GitHub, npm, VS Code, Netlify, Vite, Vercel PROJECTS
Soft Skills: Time Management, Adaptability, Communication, Collaborative mindset

Projects

ProFast - A parcel delivery platform   Live | Client-repo | Server-repo

Developed A full-stack parcel delivery platform that allows users to send parcels across the country, track deliveries in real time, and pay securely.

- Built a secure multi-role system for Users, Riders, and Admins with real-time delivery tracking and parcel status updates.
- Implemented commission logic for riders, including completed delivery tracking and a cashout feature for earned income.
- Developed role-specific dynamic dashboards with parcel assigned (Admin), delivery workflows (Rider), and Parcel requests, payment (User).

Tech Stack: React.js, Node.js, Express.js, MongoDB, Firebase, Tailwind CSS, Stripe

TrackForce   Live | Client-repo | Server-repo

Developed A full-stack employee management platform designed to streamline company-wide HR operations.

- Designed dashboards for Admins, HRs, and Employees with JWT-based authentication and access control by user type.
- Admins can promote HRs, approve payrolls, and restrict logins; HRs manage employees and verify work status.
- Employees can log work hours, monitor payroll and verification status, and interact with HR easily.

Tech Stack: React.js, Node.js, Express.js, MongoDB, Firebase, Tailwind CSS, Stripe

SnapFix   Live | Client-repo | Server-repo

Developed a full-stack service marketplace. Where service providers can showcase their service, and users can see, book and use their services.

- Created a booking system for users to request services with provider details and secure data flow.
- Developed full CRUD for services and enabled provider-side management and booking control.
- Built role-specific dashboards with personalized Add Service, Manage Service, Booked Service and Service To-Do.

Tech Stack: React.js, Node.js, Express.js, MongoDB, Firebase, Tailwind CSS

Education and Certifications

Bachelor Of Business Administration (BBA).   (Expected 2026)
